Allowable Subject Matter

1. Claims 1 and 3-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Kitamura (US 5,085,018) discloses a boom structure comprising a plurality of truss-forming multi-sided bays, a respective one of which contains a pair of battens joined together at corresponding corner regions thereof by foldable longerons therebetween, and wherein a respective side of a bay contains a plurality of diagonal cord members crossing one another and connected diagonally opposed corner regions of the respective side, such that when the foldable longerons are in their folded positions, the battens are nested together against one another in a stacked arrangement and the diagonal cord members flex into a compact stowed configuration between adjacent battens. Kitamura, however, fails to further teach that a corner region of the batten includes clamping members that are configured to engage an elongated structural tube in the stowed configuration of the boom structure and, in the course of deployment of the boom structure outwardly from its stowed configuration, the clamping members travel along and leave the elongated structure tube, and engage threads of an elongated threaded shaft that is coaxial with and extends outwardly from the elongated structural tube.

Claims 3 and 4 are allowed for depending on claim 1.

Reasons for indicating allowable subject matter for claims 5-17 were provided in the previous Office action.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
